

# ORCA RENTAL GUIDE

ORCA  
RENTAL

Our high-performance ORCA solutions are now available to be rent simplifying your cold chain logistics.

Whether you need to reduce your stock holding requirements, require ready to use solutions or require temperature-controlled packaging for short periods, ORCA Rental has the solution.

Currently, ORCA Multi-Use solutions can be rented as part of the service with rental periods set at ten days giving you ample time to get your temperature-sensitive payload safely to its final destination.

ORCA Multi-Use gives users a durable, high performing system that provides a minimum of 96 hours temperature protection across a variety of temperature ranges. Utilising vacuum insulation panels and phase change materials and with all solutions qualified against ISTA 7D, performance is maintained in the most extreme shipping lanes.

Rental periods are fixed at ten days, and the ordering process is easy and can be completed using the Intelsius online shop.

## WHY ORCA RENTAL

Trusted and quality temperature-controlled packaging is exceptionally important at this time, with vaccines, pharmaceuticals, and biologics all requiring protection throughout the shipping process. ORCA Rental gives you the opportunity to use the very best in temperature-controlled packaging in a way suited to your cold chain processes.

Benefits include;

- Access to trusted and qualified temperature-controlled packaging, ready to use when you need it
- Ability to reduce your storage and conditioning costs
- Ability to more effectively manage fluctuations in demand
- Stock flexibility with packaging that can be adapted for each rental period to suit your payload and shipping lane

## A SERVICE FLEXIBLE TO YOUR COLD CHAIN REQUIREMENTS

Build the solution best suited to your needs with ORCA Rental.

Simply select options from the below variables to create your perfect ORCA rental solution.

**Temperature:** ORCA rental systems are available in three temperature ranges: 2-8°C, 15-25°C, and -20°C. All solutions provide a minimum of 96 hours performance within these temperature parameters.

**Size:** ORCA solutions are available in four sizes: 4L, 11L, 23L, and 50L. For full dimensions and payload volumes please consult the ORCA Product Sheets.

**Pre-Conditioning:** To ensure optimum product performance rental products can be pre-conditioned in the Intelsius ISTA certified laboratory by our expert Technical Team. All pre-conditioned solutions are supplied fully assembled and ready to accept your payload on delivery.

**Delivery Legs:** Intelsius can arrange transportation of the solution to an onward shipping address ensuring your payload gets to its destination safely. Please contact us to discuss second leg delivery options.

## TREE PLANTING PROMISE

We are serious about real environmental change. By renting reusable ORCA systems you are helping us to achieve a greener future. To further support a greener future Intelsius will work in partnership with One Tree Planted to fund the planting of a new tree for every ORCA solution rented until the end of 2022.

For further details on our tree planting initiative please visit our website.
